WHY YOU NEED YOUR IT MANAGED

SERVICES

- **WORKSTATION MANAGEMENT**
  We start with our award winning Antivirus on every workstation after a 25 pt cleanup and optization process. Then we install our monitoring agent to keep it that way.

- **SERVER MANAGEMENT**
  Secondly, We update and patch your servers OS. We clean up old files and dump memory cache'. We also install Server Security software to keep your data where it belongs.

- **NETWORK ADMINISTRATION**
  We monitor and protect your network from intrussions. We have a solution for every size business..

- **MANAGED SERVICES**
  We take these three services and put them into a package that is charged monthly. A discount on each service will be applied to make it easy for your business to grow with technogly.

INFORMATION TECHNOLOGY SOLUTIONS THAT WORK FOR YOUR BUSINESS

Security is a necessary step in setting up good business practices.Your customers trust you with their information. If your data falls into the wrong hands your business could be featured on the 11pm news. The government has laws to assure businesses comply with encrypting data (Small Business Information security The Fundamentals- Richard Kissel).

Until now it was very costly to comply with these required laws. Why hire an IT employee $70,000 + a year when you can pay a team monthly for much less? We have put together a menu of services you can buy ala cart. I think you will agree times are changing and the threat of an attach is immint. Workstations need to talk to one another right? Well we call that networking and sometimes they need to talk to the internet. That outside the network connection is where the danger llives. We have solutions to protect your network and workstations while your web surfing, emailing, or downloading that funny cat picture.

You need to protect your business and your clients. We can walk you through our three step easy service. You don't have to do everything at once, but if you do we will dicount the services into a nicely priced package. To see our price list please visit our website at www.davethenerdguy.com
